Sri Lanka Consumer Confidence: *Consumer confidence improved in February 2024*

Improvements in all three indices but remain at pessimistic levels

The Institute for Health Policy (IHP) released today the February 2024 update of its Consumer Confidence Indices, which are generated from its Sri Lanka Opinion Tracker Survey (SLOTS).

All three of IHP’s Consumer Confidence indices improved in February. The Index of Consumer Sentiment (ICS), the broadest measure of the public’s view of their personal economic status and the national economy gained 6 points to 22 points. The Index of Consumer Expectations (ICE), which tracks future perceptions increased 7 points to 28 points. The Index of Current Conditions (ICC), a measure of perceptions of current conditions, also increased 4 points to 13 points.

Indices were boosted by a recovery in public expectations of the country's situation in the next 12 months and the recovery of buying conditions.

All IHP SLOTS consumer confidence indices range from zero to a potential maximum of 100, with levels below 50 indicating net pessimism.

The CCI estimates are based on 15,469 interviews conducted between Oct. 21, 2021–Mar. 7, 2024, including 579 interviews conducted in February 2024, with sample sizes varying between indices depending on response rates. All estimates are adjusted to be representative of the national population, including gender, age, ethnicity, and income level.

The SLOTS platform tracks public opinion and wellbeing daily using a large national panel recruited by face-to-face interviews and other randomly dialled respondents, with numerous peer-reviewed scientific publications that use the data. Inquiries to commission the platform to track specific issues are welcome and should be directed to info `at` ihp.lk.

Changes in IHP Consumer Confidence Measures in the last month

Measure	↓↑↔	February 2024	January 2024	December 2023	November 2023	October 2023	September 2023
Index of Consumer Sentiment (ICS)	↑ 6	22	16	21	17	22	25
Index of Consumer Expectations (ICE)	↑ 7	28	21	26	21	28	30
Index of Current Conditions (ICC)	↑ 4	13	9	15	11	13	18
Personal Financial Situation (last 12m)	↑ 1	14	13	18	12	18	20
Personal Financial Situation (next 12m)	↑ 3	29	26	27	23	29	33
Country Situation (next 12m)	↑ 14	26	12	19	16	24	26
Country Long-Term Prospects (next 5y)	↑ 5	30	25	31	24	32	31
Current Buying Conditions	↑ 7	13	6	12	11	8	15

Institute for Health Policy Sri Lanka Opinion Tracker Survey

Estimates based on 3,494 interviews conducted by SLOTS from Aug. 25, 2023–Mar. 7, 2024. Monthly values derived after weighting responses to be nationally representative according to gender, age, ethnicity, education, sector, province, and socioeconomic status.

About IHP

IHP is an independent, non-partisan research centre based in Colombo, Sri Lanka. The SLOTS lead investigator is Dr Ravi Rannan-Eliya of IHP, who has trained in public opinion polling at Harvard University and has conducted numerous surveys over three decades.

Methodology

SLOTS combines data from a national sample of adults (ages 18 and over) reached by random digit dialling of mobile numbers, and others coming from a national panel of respondents who were previously recruited through random selection. All consumer confidence index estimates are weighted to be representative of the national population, including characteristics such as age, gender, province, sector, socioeconomic status, ethnicity and education.

Funding

The SLOTS survey has previously been funded by the Neelan Tiruchelvam Trust, the UK National Institute for Health and Care Research (NIHR), The Asia Foundation in Sri Lanka, and others. Current field work is financed by the IHP Public Interest Research Fund and others. The sponsors play no role in the study design, analysis, or interpretation of findings. Furthermore, the survey findings do not necessarily reflect the views or positions of past and present funders. Interested parties can contact IHP for more detailed data and results.
